The Prosecutor's Office is a part of Azerbaijan's judicial system. Its responsibilities include investigating criminal acts and participating in court procedures. A single and centralized Prosecutor's Office reports to the Prosecutor General. The Ministry of Internal Affairs has a broad range of responsibilities, including filing criminal investigations, protection of public order, and preventing criminal offences.

In the first sentence, the article doesn't list "protecting ordinary citizens" as a responsibility of the Prosecutor's Office. What does the text say about Asynchronous Programming?

Human answer	Human misleading answer	Model answer
Asynchronous programming is one of the methods Python uses to run multiple tasks at once.	No answer	Asynchronous Programming is a style of concurrent programming where the OS is not participating. As far as the OS is concerned, you're going to have one process and there's going to be a single thread within that process, but you'll be able to do multiple things at once. The trick is to have a function that can suspend and resume, and a scheduler of sorts.
	Intended critiques • *(critical, coverage)* Asynchronous programming is clearly mentioned in the text.
